

DESIGN SYSTEM · 2.0

Private money, *clearly.*

A warm, editorial interface for a local-first finance tool. Precise enough for numbers, human enough for everyday decisions.

Selected direction: Hearth

July 2026 · Production handoff

EXPLORATION

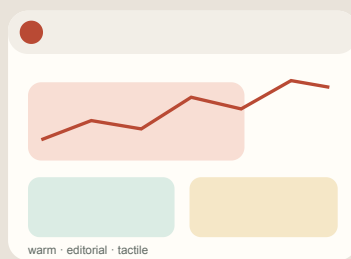

Three directions

Hearth balances trust and tactility without feeling like a bank portal. Precision explored a stricter analytical shell; Atelier pushed the editorial character further.

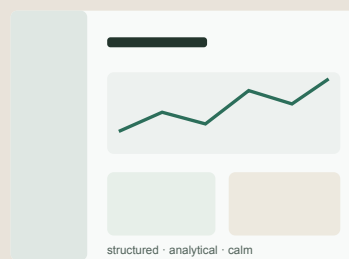

Ledger • homepage directions

Three early directions shown in light and dark. "Hearth" was selected for implementation.

TYPOGRAPHY

Character plus control

Your money has a rhythm.

Fraunces · display and financial headlines · 600–700

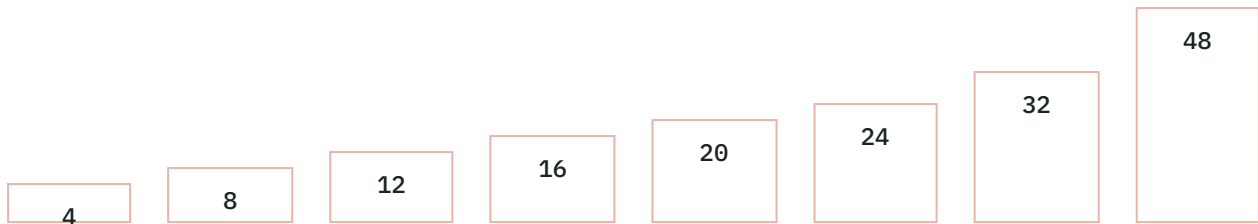

Instrument Sans carries navigation, forms, explanations, and dense transaction data without becoming anonymous.

Instrument Sans · UI and body · 400–700 · 15px / 1.5 base

C\$11,476.05

IBM Plex Mono · values, dates, rates · tabular figures

A 4px foundation

control • 42px min / 11px radius

surface • 22-26px inset / 18px radius

dialog • 24px inset / 24px radius

content • 1240px max / 20px gutter

States are part of the component

Primary button

Surface • default

Borders define grouping.
Shadow stays quiet.

Surface • hover

Color and shadow respond.
Geometry does not.

Production-ready CSS for buttons, navigation, fields, and cards is included in `component-snippets.css`.

One workspace, three modes

Mobile

320–759px

Bottom navigation, one-column content, 48px tap targets, safe-area padding.

Tablet

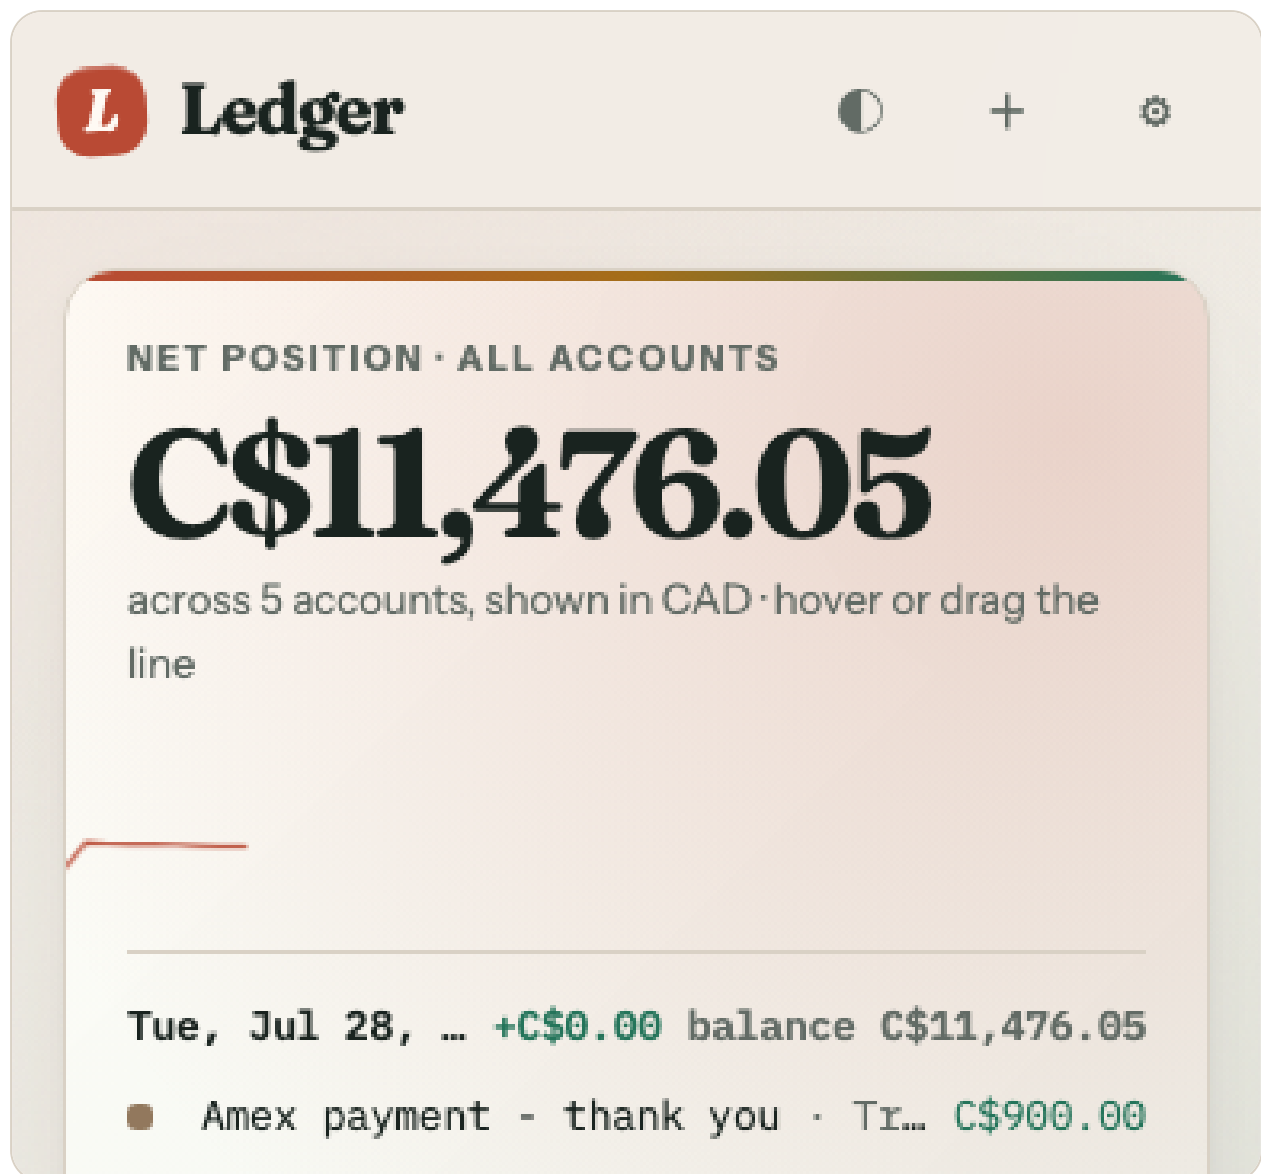

760–1099px

Top navigation, flowing content, wider forms and filters.

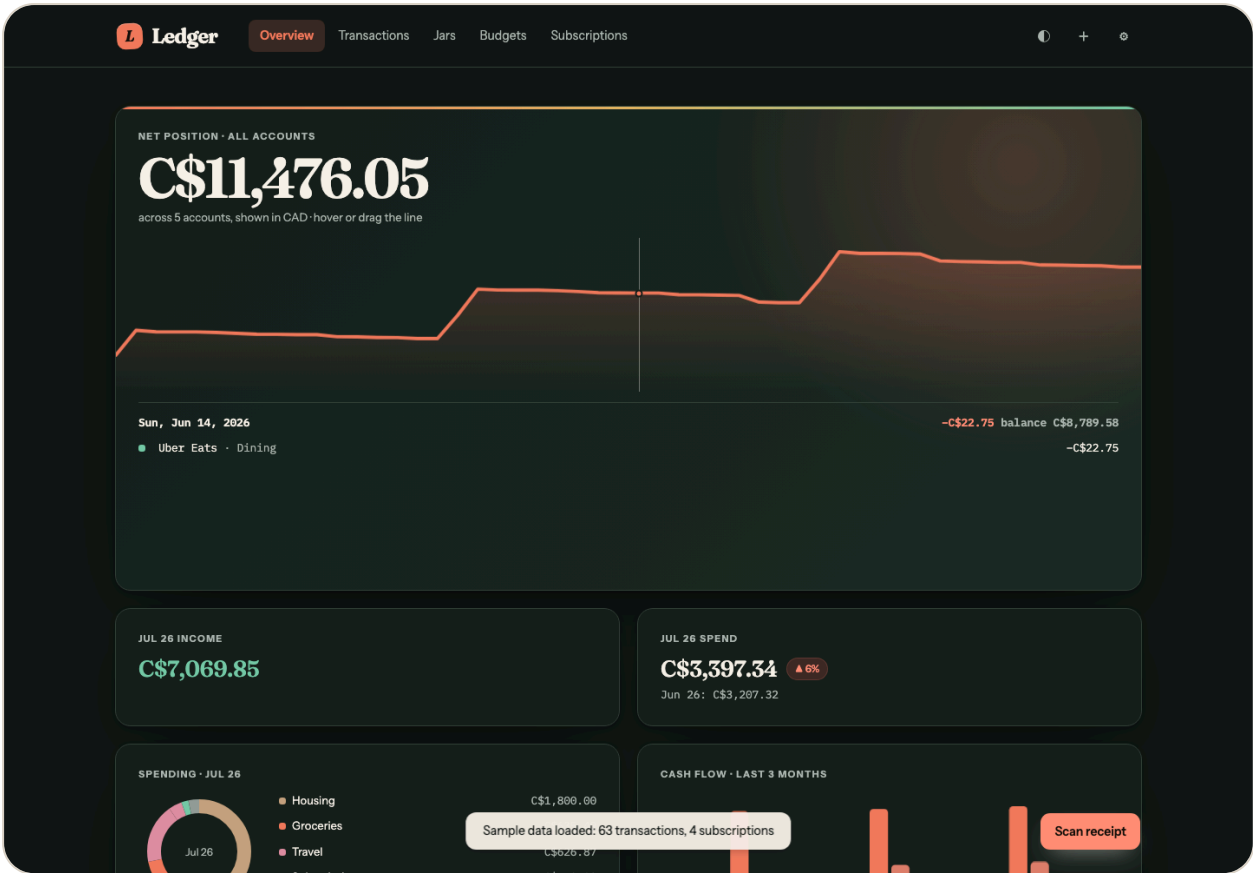

Desktop

1100px+

1240px canvas and asymmetric overview with paired analytical modules.

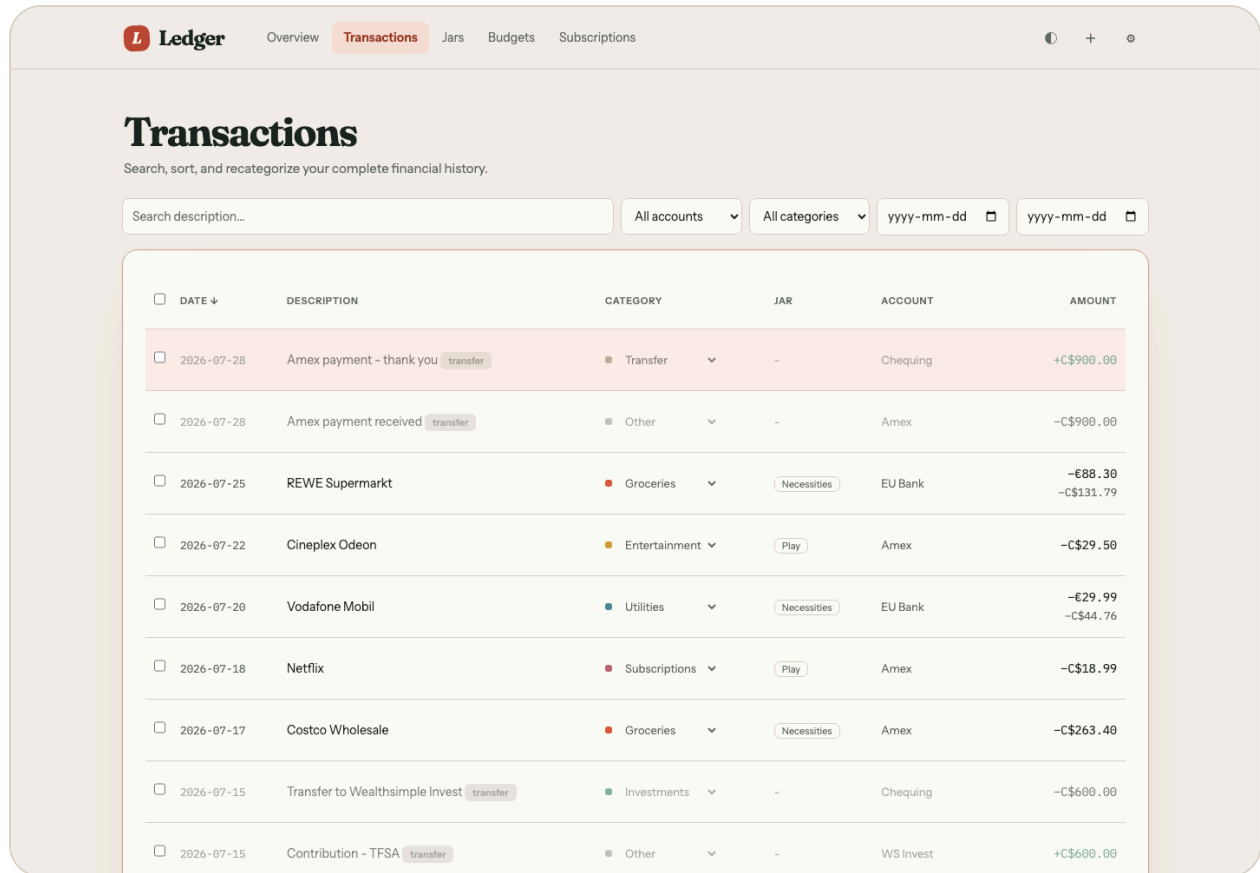

Overview • dark

MOTION & ACCESSIBILITY

Stable, fast, and legible

- 160–220ms feedback with `cubic-bezier(.22, 1, .36, 1)`.
- Cards animate border and shadow only; controls may use transform and opacity.
- Graph detail uses a fixed viewport, preventing hover-driven layout shift.
- Every control has a visible 3px focus ring and keyboard activation.
- Normal text targets at least 4.5:1; large text and non-text UI target 3:1.
- `prefers-reduced-motion` removes decorative animation.
